

Australia's innovators of marine rescue equipment

MAN-OVERBOARD RESCUE EQUIPMENT

SOS Marine is an Australian manufacturer of specialised lifejackets and marine safety equipment for the requirements of naval forces, maritime law enforcements agencies, coast guard, and various commercial off-shore oil & gas marine professionals.

Many SOS products have NSN NATO stock numbers, and our company is also ISO 9001 certified.

SOS Marine supplies a wide range of safety equipment to 9 naval forces, and one of the few companies world-wide to purpose-design and manufacture equipment to suit specialised marine work-place requirements.

Our company has a strong capacity in design and all design work is done in-house. This makes SOS very flexible in the custom tailoring process.

SOS has developed and commercialised for the search & rescue and the leisure markets two new patented man-overboard rescue products.

The SOS Dan Buoy & Sea Scoopa both provide a new dimension in safety and functionality for every size boat with advantages for both rescue teams and the person overboard.

These survival concepts surpass expectations and bring to the market-place pioneering ways to respond to emergency situations.

The S.O.S Load Bearing Boarding Party & Law Enforcement Lifejacket Vests are manufactured to ISO 12402 international standard.

SOS Marine's experience teamed with innovative designs represents a leap forward in developing a new approach for personnel who require maximum mobility and protection around water.

It enables waterfront risk management teams improve capabilities and effectively support Occupational Health and Safety (OH&S) obligations.
