Press Release

23.10.2014

sMRT Inflatable SOS Dan Buoy selected by the judges for 2014 METS Dame Awards

SOS Marine and Mobilarm subsidiary Marine Rescue Technologies (“MRT”) announce today that the **sMRT Inflatable SOS Dan Buoy** is one of the 45 products that have been nominated for final judging by the Design Award METS (DAME) 2014 jury. The products have been selected from a total of 116 entries from 23 nationalities from all over the world. The Dame Jury assess entries for overall design, build quality, functionality and use of materials. Other factors taken into account are: originality, ergonomics and price/quality ratio. The short listed products are divided over seven individual categories.

Once thrown into the water and inflated, the sMRT SOS Dan Buoy becomes a visual marker and at the same time the sMRT technology is activated which sends out an alert signal automatically transmitting GPS coordinates to your chart plotter via AIS and DSC. The SOS Dan Buoy can also provide flotation for the casualty. Its visual and electronic capabilities truly reduce the *Search* in Search and Rescue.

MRT CEO Ken Gaunt commented: "This product is a clear alternative for those environments in which individual protection is not viable such as large passenger vessels and cruise ships, or those facilities such as oil rigs and wind farms in which additional standby measures address the additional safety requirements needed."

SOS Marine's, Ross Spencer added: "We are very excited for sMRT SOS Dan Buoy to become a global benchmark in response to a rescue situation. It is specifically designed to make rescue and recovery of a man over board incident a simple and reliable operation. The sMRT SOS Dan Buoy is a very easy to use product that delivers improved safety to commercial and recreational seafarers."

The sMRT SOS Dan Buoy will be on display at METS Amsterdam, in November 2014

Notes to media:

About SOS Marine

SOS Marine is an Australian company with 30 years experience developing specialised marine safety, combat and security equipment for the Australian Defence Forces, Federal Police, Coast Guard and 12 countries Defence Forces world-wide.

The company purpose-design and manufacture a diverse range of safety and rescue equipment to suit professional marine workplace worldwide including ISO 12402 lifejackets, life rafts and the SOS Dan buoy.

Supply

SOS Marine offers custom designed products including the SOS Dan Buoy man overboard recovery, sMRT SOS Dan Buoy, SOS life rafts, SOS Waterfront Professional lifejacket Vests, Waterproof Drop bags, Helicopter Retrieval Strops, SOS Professional lifejacket with harness, Fire Rated lifejackets, MTO Buoyancy compensating Vest, SOS UDT lifejackets (Special Forces), SOS Outboard Motor Bags, Gun Holsters and Dog Harness.

SOS Marine represents some of the world`s leading manufacturers, ACR EPIRBs, Great Land Rescue Lasers and Rescue Sling.

Servicing-Life rafts-Lifejackets and SOS Dan Buoy`s

SOS Marine services life raft, lifejackets and SOS Dan Buoy`s by qualified and experienced servicing professional at all of its branches.

Design

SOS Marine has established strong relationships with some of the world`s leading component suppliers allowing us to provide a large range of variations of quality designed products with “outside the square thinking”.

The company`s broad cross-section of original design and development allows important reactivity and flexibility to face the most specific design requests and meet industry classifications standards from conception to production. This high variability in our services has the benefit of making the SOS point of differentiation.
