

## Press Release

### For Immediate Release

8<sup>th</sup> September, 2015

#### **CORROSION X TECHNOLOGY NOW AVAILABLE IN AUSTRALIA**

Corrosion X stops existing rust and corrosion and keeps it from spreading by providing a long-term protection against the rust and corrosion on the metal surface. It will crawl all by itself to where you want it without damaging rubber, neoprene and electrics.

“Corrosion X is used wherever you need corrosion to stop” says spokesperson from SOS Marine.

A light spray of this non toxic Corrosion X on exposed Outboard Motors, Air-conditioner Units, Heat Pumps, Fridges, Switches, , Electrical Boxes, Generators and Engines a couple of times a year will keep them looking like new, even in salty environments.

The US manufactured product is Mil specified aviation approved and safe to 36,000 volts. Corrosion X has full NATO and US Military specs and Aviation approved. Meets the US Navy’s tough new corrosion prevention and control performance requirement (MIL-PRF-8109F)

Corrosion X is now available at SOS Marine.

SOS Marine specialises in the supply and service of marine safety equipment and consultancy to a worldwide client base, including marine professionals and the marine leisure industry.
