

New Dimensions
In safety for
State Emergency Service

New technologies bring new tools, new rules

SOS Marine has a long and successful history for meeting challenges of the future. We are continuously updating and developing new product capabilities to meet current and future needs of SES Teams modernisation requirements by using new materials, technology and services.

New trends and new rules are changing the way we work. There is a growing demand for safety equipment to allow workers to be more efficient and comfortable.

As work stages evolve in a world that is becoming more mobile there is increase awareness in meeting OH&S continuously evolving requirements.

We are continuing to advance, improve and modernise essential safety equipment for SES Teams efficiency.

- With a Lifejacket purposely designed. The PFD Type 2 is constructed using closed cell foam, adjustable in size incorporating a 3 litre SOS Hydrapac hands-free hydration system.
- SES Load-Bearing Equipment Vest manufactured from a highly breathable, heavy duty materials with several pouches in various sizes to carry equipment and personal items with optional hydration system hands-free.

SOS Marine functions in a design-assist capacity, helping you develop and implement your own custom designs and making a positive difference in your working capabilities.

....preparing for the next
