

SOS Dan Buoy is smart safety for the wives, moms, sisters, daughters and girl friends of men who love boating

The girls from down-under now have a proven successful rescue device that is easy-to-use and ready for a fast response if their man goes overboard.

The SOS Dan Buoy is an Australian invention. It has made one of the biggest changes to safety in man overboard rescue in the marine industry for decades. It is a portable, compact unit, similar to a ladies hand-bag. There is no assembling needed you just pick up and respond to the emergency.

“With increasing man overboard incidents, there was a need identified to develop a simple-to-use rescue operation to reduce the risks associated when someone goes over-board. This new system is self-evidently an easier method” says spokesperson from SOS Marine. The SOS Dan Buoy is the only flotation of its kind in the world tested to elements of the ISO 12402 lifejacket standard, and Yachting Australia compliant.

In difficult and dangerous rescue operations deployment of several SOS Dan Buoys can be dropped from a helicopter to mark and identify the location of persons overboard. The self-inflating SOS Dan Buoy offers support in the water, as it has webbing loops (patented) giving a greater sense of security and extra level of protection especially when the M.O.B is fatigued.

The SOS Dan Buoy inflatable marker is an effective and accurate rescue system, as it indicates wind and current directions. It is highly visible, the fluorescent yellow 2.5 metre streaming ribbon waves back and forth in a breeze allowing it to be seen up to 1700 metres away. It includes a SOLAS light for night rescues.

The SOS Dan Buoy has the extra benefit of removing the drogue and attaching an anchor so it can be used as a temporary marker for wrecks, channels, and dive or crash sites. If you crew on another boat, it is easily transportable, as it folds away in a small carry bag. It is reusable after replacing a 33gram cylinder and an activation cartridge.

The multi-award winning SOS Dan Buoy was developed by SOS Marine, an Australian manufacturer of specialised marine safety equipment. SOS develops marine safety equipment for 9 naval forces worldwide.

The SOS Dan buoy can be thrown by man, woman or child to someone who has the misfortune to go overboard. A must for every skippers safety check list.

Don't leave shore without your *SOS Dan Buoy*
