

# SOS WATER RESCUE LIFEJACKETS

SOS Marine has worked with the NSW SES on design and development of these purpose-designed lifejackets

SOS Marine is going as green as possible with our new design of the SOS Water Rescue Lifejackets. It is made using environmentally friendly foam, PVC free compound- ECO friendly

Product code SOS-9929-6

In addition to reducing the environment footprint, the design incorporates a drinking bladder within the rear of the vest which allows the wearer to have access to quality drinking water while working around marine environment or in the event of a person-overboard situation

**NEW innovation of managing hydration in the marine environment**

*This assists the carbon footprint associated with bottling and transporting plastic water bottles.*

**Drinking bladder in rear of Lifejacket**

There is a quick and easy ability to immediately replenish your team's water supply by refilling the water bladder; just by lifting the outer flap-cover to refill the bladder. It is easily removed from the rear and replaced with a new water bladder if worn by new team member

- This high visibility and close fitting vest is made of woven fabric air textured material which allows the body to breath. The outer material is water resistant and excellent for UV protection. The SOS Water Rescue Vest contains extra flotation to combat reduced buoyancy in turbulent water.
- The vest has two webbing D rings permanently attached to the bottom of the lifejacket for attaching accessories with several pockets allowing rescue swimmers to safely and quickly reach victims in moving water this includes an over the shoulder *cow tail* aiding in self rescue.
- Pockets are provided to stow first aid supplies, radio, epirob and personal items. It is fitted with a pea-less whistle.
- An integrated structural harness with front and back protective plates and single piece over-the-shoulder foam design provide extra strength, structural integrity and body protection.
- The SOS Vest has a heavy duty zipper fastened at the front an adjustable waist belt to provide a secure fit and prevent ride up with a quick release belt to help the rescuer to escape dangerous situations. Fast Tabs on both shoulders act as easy attachment points for accessories.
