

# Care of your SOS Dan Buoy

The patented SOS Dan Buoy`s are sold around the world with UML auto inflation system

If moisture gets to the SOS Dan Buoy, it is like a life jacket it will automatically inflate.

Please take to look at **UML website** for information about auto inflation.  
[http://www.uml.co.uk/how\\_it\\_works.html](http://www.uml.co.uk/how_it_works.html)

Your SOS Dan Buoy is valuable- it is recommended to stow inside cabin when your boat is **unattended**

Also, stow your SOS Dan Buoy when weather and **waves are repeatedly excessive.**

Or use the **SOS Rail Mount holder** to stow your SOS Dan Buoy for maximum protection

At SOS Marine we take great care in the manufacturing and design so that many parts can be repaired or replaced if damaged. In most cases this avoids cost of complete replacement.

Your SOS Dan Buoy is an important piece of safety equipment and needs to be properly maintained and serviced throughout its lifetime
