

# SOS MARINE

SOS Marine **Pink Lifejackets** remain compactly packed until there is emergency and full buoyancy if required. Buoyancy is provided by the activation of a CO2 cylinder that inflates a bladder packed behind a protective outer cover (horse-shoe style or vest). The CO2 cylinder is active either automatically or manually depending on operation system, all with backup oral inflation.

- 150 Newton inflatable lifejacket with self-righting capacity
- Aiding location with a highly visible fluoro yellow bladder protected by a very resilient Hot Pink Outer Cover
- 150N incorporates 6 pieces SOLAS reflective strips on the bladder for high visibility in poor conditions.
- The lifejacket 150N uses a UML firing system and is inflated with a 33gram cylinder.
- A fully adjustable back strap to prevent the lifejacket riding up and chafing the neck
- Tube for oral inflation with emergency whistle
- Easy to use, unique stainless steel interlocking waist buckles with a D ring for lifeline.
- Fits body weight adult greater than 40kg with chest 86-127cm

The adult lifejacket complies with **AS.1512 Australian Maritime** Safety Standard for personal flotation.

The adult's Pink inflatable Life Jacket will retail for \$220.00 (including GST) with \$50.00 of the proceeds to be donated to Cancer Council.
