

SOS LIFE JACKETS

CERTIFIED TO ISO 12402

Quick Burst Zipper Lifejackets

Manual/Automatic

The lifejacket has a zipper inspection opening on the wearer's right hand side at the bottom of the valise. To see if the cylinder & inflation cartridge are still operational, the sensors are **GREEN** unit is operational. If the sensor is **RED** Stop & Service

SOS Marine Lifejackets are a unique inflatable PFD they are designed to be housed in and around the neck collar valise with a Quick Bursting Zipper and adjustable waist belt and back strap.

Optional: This lifejacket can be attached to a mesh vest or molly vest with a zipper fastening at the front with sufficient adjustment as to be worn over wet weather clothing.

- This lifejacket incorporates two (2) zipper pockets, one on the bottom of the valise on the wearer's left hand side this can be used for spare cylinder and inflation cartridge or for rescue beacon or general cargo. The other side is for checking to see if the cylinder and inflation cartridge are operational.
- Lifejackets have been designed with two operating systems, manual and automatic versions. Both are compatible so that you can upgrade from a manual to automatic. The wearer can also inflate the lifejacket via the oral inflation tube on the left-hand side.
- The waist belt and back strap are constructed from 50mm webbing and features a stainless steel interlocking style buckle and D ring for attaching a safety harness.
- The lifejacket has been designed to turn the body of a conscious or unconscious person face up at the correct angle of floatation with the mouth and nose held clear of the water in the minimum of time.
- A SOLAS flashing signal light can be fitted and would be located on the front chest area. It is activated upon immersion in water and if necessary turned off during daylight hours.
- SOLAS grade tape is located on a minimum of six (6) places on the upper side of the buoyancy chamber, as well as, in two (2) places on the hood, if fitted.
- A pea-less whistle is provided for use in water.
- Certified to ISO 12402
