Lifejackets for the professionals

The SOS Waterfront load-bearing lifejacket vest provides a new innovation in managing hydration in the marine environment. The jacket incorporates a drinking bladder into the design, which allows the wearer to have access to quality drinking water while working, or in the event of a person overboard situation. This assists in maintaining hydration levels in the wearer and helps reduce the carbon footprint associated with packaging and transporting bottled water.

Dehydration is one of the main medical emergencies confronting marine Occupational Health and Safety.
